CableBass
32 BASS-SOUNDS FOR MINIMAL, ELECTRO & TECH-HOUSE

CFA SOUND

ACE is most qualified for basses through his outstanding analog sound. Therefore this small soundset contains 32 bass-sounds for minimal, electro & tech-house. Evolving subs, percussive basses or raw and wild drifting electro basses – all this you can find in CableBass. And same like "CableDrum" - it`s for free! (ACE 1.0 required]

Installation-note:
Copy the folder "*00 CableBass Soundset*" , to the directory "*….VstPlugins/Ace/ACE Data/Presets/ACE*"

Don't forget to check the other soundsets of the Cable-series:

CableDance

64 sounds for electro, house & minimal

Let the cables dance! Not many synthesizers get well-known like the ACE so fast - why? Because the ACE sounds absolutely great and this soundset shows how analog and fat he can sound. It includes plenty of phat basses and stirring synthsounds, alongside with rough sequences, weird fx-sounds and analog drumsounds. Definitely it's a must-have for everyone using ACE for electro, house & minimal.

CableForce

64 sounds for trance, house & hardtrance

The second CFA set for ACE – 64 amazing trance sounds for the little cable-monster, hereby demonstrating again why it is the new reference among all vst-synths. Beautiful pluck sounds, outstanding key-synths, alongside with dynamic and massive leadsounds, together with pushing basses and amazing pads. This soundset shows just like the first one how incredible this synth is. This soundsets focuses on trance, house and also hardtrance.

CableSphere

64 sounds for ambient, minimal & EDM

It's arrived: CableSphere, the third CFA soundset for U-He ACE. This collection of carefully selected sounds includes smooth analog sounds, weird fx, groovy and straight sequences and, as a special: wavetable sounds! No, that's absolutely right: due to it's mapping generator ACE can use self-drawn wavetables, giving access to completely new sound facettes.
