

DIY PRESET KIT FOR DIVA

Welcome to the **DIY Preset Kit** for Diva. This brand new pack contains 64 do-it-yourself presets, carefully initialized and completely empty without any filter settings, effects, envelopes or modulation - just waiting to be tweaked into the perfect pad, synth, bass, lead, soundscape or arpeggio with countless hours of fun for the studio craftsman.

Wanna re-create the famous Vangelis CS-80 Blade Runner lead or make a huge and epic Deadmau5 trance lead? It's all hidden in there and using your imagination, you can easily

imagine what the presets can become when the full potential is unfolded. Start your journey today and create the ultimate set of sounds with the DIY Preset Kit for Diva.

How to install

After unzipping, copy the **DIY Preset Kit** folder and paste it into the patches folder in Diva. The easiest way to locate that folder is to go to the *Patches* tab of Diva, right click *Third Party* and choose *Show in Explorer* (PC) or *Reveal in Finder* (Mac) this will open the location of the Diva patches depending on your operating system these are:

Windows: `VSTplugins\Divadata\Presets\Divadata`

Mac: `Macintosh HD > Library > Audio > Presets > u-he > Diva`

Enjoy the sounds!
